

International Attitudes Toward Global Policies

Adrien Fabre (CNRS, CIRED),

Thomas Douenne (University of Amsterdam), Linus Mattauch (TU Berlin, Oxford)

April 2023

Questionnaires

International surveys with a focus on the West

OECD survey (02/2021-02/2022):

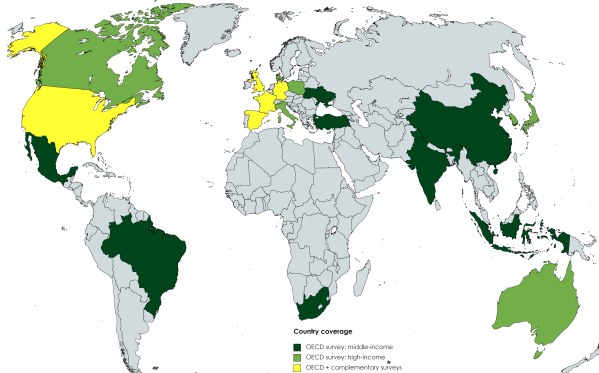

20 countries; 2,000 respondents per country; median duration: 28 min.

Complementary surveys (01/2023-ongoing):

Eu: 3,000 respondents from France, Germany, Spain, UK; 20 min.

US1: 3,000 respondents from the U.S.; 14 min.

US2: 2,000 respondents from the U.S.; 11 min.

Stated support for global policies

OECD: Global policies are strongly supported.

Share of support (somewhat or strongly) for the main global policies among non-*indifferent*.

Level at which climate policies are needed (Multiple choice question)

Global

Federal/Continental

State/National

Local

Global climate policies (5-Likert scale)

Global carbon budget (+2°C) divided in tradable country shares

Global tax on millionaires to finance low-income countries

Global democratic assembly on climate change

Global tax on GHG financing a global basic income

Burden sharing preferences for the global carbon budget (5-Likert)

Emission share should be in proportion to population*

Countries that have emitted more since 1990 should receive a lower share*

Countries that will be hurt more by CC should receive a higher share*

Emission share should be in proportion to current emissions

The Global Climate Scheme (GCS)

Our main policy of interest is the GCS, a **global emissions trading system funding a global basic income**:

At the Paris agreement in 2015, all countries have agreed to contain global warming “well below +2 °C”. To limit global warming to this level, **there is a maximum amount of greenhouse gases we can emit globally**.

To meet the climate target, a limited number of permits to emit greenhouse gases can be created globally. Polluting firms would be required to buy permits to cover their emissions. Such a policy would **make fossil fuel companies pay** for their emissions and progressively raise the price of fossil fuels. **Higher prices would encourage people and companies to use less fossil fuels, reducing greenhouse gas emissions**.

In accordance with the principle that each human has an equal right to pollute, the revenues generated by the sale of permits could finance a global basic income. **Each adult in the world would receive \$30/month**, thereby lifting out of extreme poverty the 700 million people who earn less than \$2/day.

The typical [American] would lose out financially [\$85] per month (as he or she would face [\$115] per month in price increases, which is higher than the \$30 they would receive).

The policy could be put in place as soon as countries totaling more than 60% of global emissions agree on it. Countries that would refuse to take part in the policy could face sanctions (like tariffs) from the rest of the World and would be excluded from the basic income.

Net gains from the Global Climate Scheme

Support for the Global Climate Scheme

To offset the losses of the median emitter, we design a **National Redistribution Scheme** (NR) funded by increased income taxes on the top 5% (US) / 1% (Eu).

Support for the Global Climate Scheme

To offset the losses of the median emitter, we design a **National Redistribution Scheme** (NR) funded by increased income taxes on the top 5% (US) / 1% (Eu).

We test understanding of the distributive effects of the GCS, NR, and both combined (and then give the expected answer) in an incentivized way after each policy description.

Support for the Global Climate Scheme

To offset the losses of the median emitter, we design a **National Redistribution Scheme** (NR) funded by increased income taxes on the top 5% (US) / 1% (Eu).

We test understanding of the distributive effects of the GCS, NR, and both combined (and then give the expected answer) in an incentivized way after each policy description.

We also describe a national climate policy. US: Coal exit / Eu: Insulation plan (mandatory, subsidised).

Support for the Global Climate Scheme

To offset the losses of the median emitter, we design a **National Redistribution Scheme** (NR) funded by increased income taxes on the top 5% (US) / 1% (Eu).

We test understanding of the distributive effects of the GCS, NR, and both combined (and then give the expected answer) in an incentivized way after each policy description.

We also describe a national climate policy. US: Coal exit / Eu: Insulation plan (mandatory, subsidised).

Do you support...? *Yes/No* (Percentage of *Yes*)

| | | United States | Europe | France | Germany | Spain | United Kingdom |
|-------------------------------------|----|---------------|--------|--------|---------|-------|----------------|
| Global climate scheme (GCS) | 53 | 76 | 80 | 71 | 81 | 74 | |
| National redistribution scheme (NR) | 56 | 73 | 77 | 66 | 79 | 75 | |
| National climate policy + GCS + NR | 52 | 74 | 79 | 69 | 81 | 70 | |

Support for other global policies

Do you support or oppose...? 5-Likert scale (Percentage of *Support* among non-Indifferent)

| | | United States | Europe | France | Germany | Spain | United Kingdom |
|--|----|---------------|--------|--------|---------|-------|----------------|
| Payments from high-income countries to compensate low-income countries for climate damages | 55 | 71 | 72 | 70 | 79 | 70 | |
| High-income countries funding renewable energy in low-income countries | 68 | 82 | 82 | 82 | 85 | 81 | |
| High-income countries contributing \$100 billion per year to help low-income countries adapt to climate change | 60 | 76 | 77 | 79 | 79 | 71 | |
| Cancellation of low-income countries' public debt | 46 | 53 | 53 | 43 | 62 | 61 | |
| Democratise international institutions (UN, IMF) by making a country's voting right proportional to its population | 58 | 71 | 69 | 69 | 78 | 72 | |
| Removing tariffs on imports from low-income countries | 62 | 73 | 58 | 73 | 80 | 83 | |
| A minimum wage in all countries at 50% of local median wage | 63 | 80 | 80 | 78 | 81 | 83 | |
| Fight tax evasion by creating a global financial register to record ownership of all assets | 62 | 87 | 90 | 86 | 91 | 87 | |
| A maximum wealth limit of \$10 billion (US) / €100 million (Eu) for each human | 46 | 62 | 58 | 62 | 65 | 67 | |
| National tax on millionaires | 73 | 85 | 81 | 87 | 89 | 88 | |
| Global tax on millionaires | 69 | 84 | 84 | 84 | 87 | 83 | |

Support for a global wealth tax

We describe a global tax on wealth in excess of \$/€/£ 5 million and either ask:

Support for a global wealth tax

We describe a global tax on wealth in excess of \$/€/£ 5 million and either ask:

Percent of wealth tax that should go to low-income countries (*mean*):

Support for a global wealth tax

We describe a global tax on wealth in excess of \$/€/£ 5 million and either ask:

Percent of wealth tax that should go to low-income countries (*mean*):

Whether half of the tax revenues should go to low-income countries (vs. none).

⇒ Median Eu preference is 30% of global wealth tax for low-income countries.

Support for increased foreign aid

Actual, perceived and preferred amount of foreign aid, with random info (or not) on actual amount. (*Mean*)

| | United States | Europe | France | Germany | Spain | United Kingdom |
|--|---------------|--------|--------|---------|-------|----------------|
| Actual foreign aid (in % of public spending) | 0.4 | 1.1 | 0.8 | 1.3 | 0.5 | 1.7 |
| Belief about foreign aid | 4.7 | 2.9 | 2.7 | 2.9 | 2.8 | 3.5 |
| Preferred foreign aid (with info) | 1.8 | 2.7 | 3.4 | 2.9 | 2.1 | 2.5 |
| Preferred foreign aid (no info) | 4 | 3.9 | 4.7 | 4.4 | 3.1 | 3.4 |

Support for increased foreign aid

Actual, perceived and preferred amount of foreign aid, with random info (or not) on actual amount. (*Mean*)

| | United States | Europe | France | Germany | Spain | United Kingdom |
|--|---------------|--------|--------|---------|-------|----------------|
| Actual foreign aid (in % of public spending) | 0.4 | 1.1 | 0.8 | 1.3 | 0.5 | 1.7 |
| Belief about foreign aid | 4.7 | 2.9 | 2.7 | 2.9 | 2.8 | 3.5 |
| Preferred foreign aid (with info) | 1.8 | 2.7 | 3.4 | 2.9 | 2.1 | 2.5 |
| Preferred foreign aid (no info) | 4 | 3.9 | 4.7 | 4.4 | 3.1 | 3.4 |

Support for increased foreign aid (vs. reduced or stable): from previous question, and directly asked (with info).

| | United States | Europe | France | Germany | Spain | United Kingdom |
|---|---------------|--------|--------|---------|-------|----------------|
| Preferred foreign aid is higher than current | 47 | 59 | 75 | 58 | 63 | 43 |
| Preferred foreign aid is higher than perceived | 37 | 53 | 64 | 59 | 54 | 39 |
| Supports increasing foreign aid (incl. with conditions) | 60 | 64 | 63 | 68 | 69 | 56 |

Actual foreign aid is overestimated.

Majorities support more foreign aid.

Conditions for increased foreign aid

[Info on actual amount]. Do you support [the U.S.] transferring more money to low-income countries?

■ No, should be reduced ■ No, should remain stable ■ Yes, but at some conditions ■ Yes, should be increased

Should [Country]'s foreign aid increase?

Conditions for increased foreign aid

[Info on actual amount]. Do you support [the U.S.] transferring more money to low-income countries?

■ No, should be reduced ■ No, should remain stable ■ Yes, but at some conditions ■ Yes, should be increased

Should [Country]'s foreign aid increase?

[If *at some conditions*] What conditions should be required for [the U.S.] to increase its foreign aid?

Conditions for increased foreign aid

[Info on actual amount]. Do you support [the U.S.] transferring more money to low-income countries?

■ No, should be reduced ■ No, should remain stable ■ Yes, but at some conditions ■ Yes, should be increased

Should [Country]'s foreign aid increase?

[If *at some conditions*] What conditions should be required for [the U.S.] to increase its foreign aid?

People want to help people (not oligarchs) and to foster climate action and human rights.

National preference is the main reason behind not wanting increased foreign aid.

Preferences over public spending

Your previous answer shows that you would like to increase [UK] foreign aid.

How would you like to finance such increase in foreign aid? (Multiple answers possible)

Your previous answer shows that you would like to reduce [UK] foreign aid.

How would you like to use the freed budget? (Multiple answers possible)

People want better public services and higher taxes on the wealthiest.

Sincerity of the support for the GCS

Perceptions of the Global Climate Scheme

When determining your support or opposition to the Global climate scheme, which points are important to you?

Petition

Would you be willing to sign a petition for the [GCS / NR]?

As soon as the survey is complete, we will send the results to the [head of state] (...) *Yes/No*

| | | United States | Europe | France | Germany | Spain | United Kingdom |
|----------------------------------|----|---------------|--------|--------|---------|-------|----------------|
| Petition for the GCS | 51 | 69 | 69 | 66 | 78 | 69 | |
| (Comparable) support for the GCS | 53 | 76 | 81 | 74 | 81 | 74 | |
| Petition for NR | 57 | 67 | 65 | 66 | 74 | 68 | |
| (Comparable) support for NR | 58 | 72 | 76 | 65 | 78 | 75 | |

Willingness to sign a real-stake petition is generally (1 to 7 p.p.) lower than stated support.

But this is not specific to GCS, and majorities are still willing to sign the petition.

List experiment

We ask *Among the policies below, how many do you support?*, randomly varying the list of policies.

The difference in mean number of supported policies for lists with and without the GCS should equal the support for GCS. If the **tacit support** is **lower**, it may indicate a **social desirability bias**.

List experiment

We ask *Among the policies below, how many do you support?*, randomly varying the list of policies.

The difference in mean number of supported policies for lists with and without the GCS should equal the support for GCS. If the **tacit support is lower**, it may indicate a **social desirability bias**.

| | Number of supported policies | | |
|---------------------------------|------------------------------|---------------------|---------------------|
| | All | US | Eu |
| List contains: GCS | 0.624*** (0.028) | 0.524*** (0.041) | 0.724*** (0.036) |
| <i>Support for GCS</i> | 0.617 | 0.542 | 0.757 |
| <i>Social desirability bias</i> | -0.026 | -0.018 | -0.033 |
| <i>80% C.I. for the bias</i> | [-0.06; 0.01] | [-0.07; 0.01] | [-0.08; 0.01] |
| Constant | 1.317 | 1.147 | 1.486 |
| Observations | 6,000 | 3,000 | 3,000 |
| R ² | 0.089 | 0.065 | 0.125 |

Note:

*p<0.1; **p<0.05; ***p<0.01

⇒ **No (significant) social desirability bias.**

Conjoint analyses: interaction with other policies

National climate policy (C) is as supported as the GCS, but no substitute for it.

Support for the GCS does not increase when complemented by National Redistribution.

⇒ Confirms that the **monetary loss is not a primary concern** for one's attitude toward the GCS.

Among the two following bundles of policies, which one would you prefer?

| | | United States | Europe | France | Germany | Spain | United Kingdom |
|-----------------------------|----|---------------|--------|--------|---------|-------|----------------|
| Global climate scheme (GCS) | 53 | 76 | 80 | 71 | 81 | 74 | |
| NR+GCS preferred to NR | 55 | 77 | 79 | 74 | 79 | 77 | |
| C+NR+GCS preferred to C+NR | 55 | 74 | 79 | 71 | 78 | 68 | |
| NR+C preferred to NR | 62 | 84 | 88 | 83 | 84 | 82 | |
| GCS+NR preferred to C+NR | 47 | 52 | 53 | 53 | 49 | 52 | |

Conjoint analyses: influence on electoral prospects

Conjoint analyses: influence on electoral prospects

Table 1: Imagine if the [Democratic and Republican presidential candidates in 2024] campaigned with the following policies in their platforms. [Credible Progressive and Conservative platforms]

Which of these candidates would you vote for? *A; B; None of them*

[FR: second round of presidential; DE, ES, UK: two favorite candidates in one's constituency]

| | Prefers the Progressive platform | | | | | |
|-----------------------------|----------------------------------|------------------|---------------------|------------------|------------------|-------------------|
| | All | United States | France | Germany | UK | Spain |
| GCS in Progressive platform | 0.028* (0.014) | 0.029 (0.022) | 0.112*** (0.041) | 0.015 (0.033) | 0.008 (0.040) | -0.015 (0.038) |
| Constant | 0.623 | 0.604 | 0.55 | 0.7 | 0.551 | 0.775 |
| Observations | 5,202 | 2,619 | 605 | 813 | 661 | 504 |
| R ² | 0.001 | 0.001 | 0.013 | 0.0003 | 0.0001 | 0.0003 |

Note: The 14% of *None* answers have been excluded from the regression samples. GCS has no significant influence on them.

A progressive candidate would not lose votes by endorsing the GCS, and could even gain 11 p.p.*** in France.

Conjoint analyses: influence on preferred platform

We ask the preference between two progressive platforms, where each measure is taken at random.
The GCS is included in one of the platforms.

Imagine that a [Left or Center-left coalition wins the next elections]. Here are two possible platforms on which [the coalition] may campaign (the policies in each platform are randomly drawn from a pool of credible [Left/Center-left] policies).

Even if you do not support the Left, which of these platforms do you prefer?

[FR: Left or center-left; DE: rot-rot-grüne; ES: PSOE; UK: Labour; US: Democratic primary (*not asked to Republican*)]

| | United States | Europe | France | Germany | Spain | United Kingdom |
|---------------------------------------|---------------|--------|--------|---------|-------|----------------|
| Random programs: A+GCS preferred to B | 58 | 60 | 61 | 59 | 65 | 58 |

⇒ Majorities prefer platforms that include the GCS.

Conjoint analyses: influence on preferred platform (Eu)

(...) Even if you do not support the Left, which of these platforms do you prefer?

Europeans prefer platforms that include the GCS and without the ban on thermal cars (a planned policy).

The effect of GCS is among the highest (wealth tax, better public services, higher minimum wage).

Conjoint analyses: influence on preferred platform (France)

France shows that there can be a **mismatch between preferred** policies (insulation plan, public services, global tax, GCS) **and enacted policies** (higher retirement age and ban on thermal cars: the least preferred).

Imaginez que la gauche ou le centre gauche gagne les prochaines élections en 2027. Voici deux programmes possibles sur lesquels elle pourrait faire campagne (...), lequel de ces programmes préférez-vous ?

Climat:

Interdiction des véhicules les plus polluants dans les centres-villes (ZFE)

Plan pour l'isolation thermique

Interdiction de la vente de voitures thermiques neuves d'ici 2030

Économie:

Versement du RSA aux 18-25 ans sans emploi

SMIC à 1600€ net par mois

Recul de l'âge légal de départ à la retraite à 65 ans

Hausse de 20% du financement de l'hôpital public et de l'Éducation nationale

Politique étrangère:

Plan mondial pour le climat

Taxe mondiale sur les millionnaires

Assemblée démocratique mondiale sur le changement climatique

Doubler l'aide au développement des pays à faibles revenus

Démocratie:

Élection des députés à la proportionnelle

Référendum d'Initiative Citoyenne (RIC)

Fiscalité:

Plan de redistribution nationale

Rétablissement de l'impôt sur la fortune (ISF)

Conjoint analyses: influence on preferred platform (US)

Endorsing the GCS is not determinant to gain the Democratic primary.

[Only on non-Republican] Imagine that at the 2024 Democratic party presidential primaries, the two main candidates campaign with the following key policies in their platforms.

Which of these candidates do you prefer?

Climate policy:

Ban the sale of new combustion-engine cars by 2030

Coal exit

Trillion dollar investment in clean transportation infrastructure and building insulation

Economic issues:

\$15 minimum wage

Funding affordable housing

Student loan forgiveness

Universal childcare/pre-K

Foreign policy:

Doubling foreign aid

Global climate scheme

Global democratic assembly on climate change

Global tax on millionaires

Societal issues:

Expanding the Supreme Court

Handgun ban

Making abortion a right at the federal level

Tax system:

Increase corporate income tax rate from 21% to 28%

National redistribution scheme

Wealth tax

“you have 100 points that you can allocate to different policies. The more you give points to a policy, the more you support it.

How do you allocate the points among the following policies?”

[6 policies taken at random]

GCS is as prioritized as the average policy, or even more in France and Germany.

It is more prioritized than some planned climate policies, like the ban on thermal cars.

The global tax on millionaires is among the most prioritized measures. It as prioritized as a national wealth tax, if not more.

Most prioritized are better public services and a higher minimum wage.

Prioritization

Mean number of points

| | United States | Europe | France | Germany | Spain | United Kingdom |
|--|---------------|--------|--------|---------|-------|----------------|
| econ1 | 13 | 21 | 10 | 14 | 35 | 31 |
| econ2: [Higher minimum wage] (DE: Bürgerversicherung) | 23 | 22 | 25 | 21 | 22 | 23 |
| econ3 | 21 | 15 | 13 | 18 | 17 | 13 |
| econ4 | 28 | 22 | 27 | 17 | 24 | 20 |
| soc1 | 10 | 17 | 13 | 17 | 12 | 21 |
| soc2 | 13 | 9 | 14 | 8 | 10 | 8 |

| climate2: Thermal insulation plan (US: also transport) | 20 | 18 | 22 | 19 | 15 | 17 |
| climate3: Ban the sale of new combustion-engine cars by 2030 | 11 | 9 | 8 | 8 | 9 | 11 |
| tax1: National redistribution scheme | 14 | 15 | 16 | 15 | 15 | 15 |
| tax2: Wealth tax (ES: raise tax on top incomes) | 19 | 19 | 21 | 18 | 17 | 19 |
| foreign1: Global climate scheme | 15 | 20 | 20 | 23 | 16 | 17 |
| foreign2: Global tax on millionaires | 21 | 20 | 20 | 23 | 19 | 20 |
| foreign3: Global democratic assembly on climate change | 15 | 15 | 15 | 17 | 14 | 13 |
| foreign4: Doubling foreign aid | 9 | 11 | 13 | 14 | 9 | 8 |

Second-order beliefs

Belief about the support

Beliefs on the support for the GCS are relatively accurate:

no evidence of pluralistic ignorance in the U.S.

an underestimation by 15-20 p.p. in Eu.

According to you, what percentage of [Americans] answer *Yes* to the previous question?

The three people who are closest to the true value get [\$50]. *Mean answer*

| | | United States | Europe | France | Germany | Spain | United Kingdom |
|---------------------|----|---------------|--------|--------|---------|-------|----------------|
| Belief about GCS | 52 | 59 | 61 | 56 | 63 | 57 | |
| Support for the GCS | 53 | 76 | 80 | 71 | 81 | 74 | |
| Belief about NR | 55 | 58 | 60 | 53 | 62 | 59 | |
| Support for NR | 56 | 73 | 77 | 66 | 79 | 75 | |

Universalist values

Donation to Africans vs. fellow citizens

Respondents might win a \$/€/£ lottery prize, they have to decide which share to donate if they win.
Donation is to people in need, either in Africa or in their own country (random treatment).

Donation to Africans vs. fellow citizens

Respondents might win a \$/€/£ lottery prize, they have to decide which share to donate if they win.

Donation is to people in need, either in Africa or in their own country (random treatment).

Table 2: (...) In case you are winner of the lottery, what share of the [\$]100 would you donate to [African / [own country]] people living in poverty through GiveDirectly?

| | Donation to poor people (in %) | | |
|------------------------|--------------------------------|-------------------|-------------------|
| | All | US | Eu |
| Poor is in own country | 0.590 (0.867) | 2.509* (1.300) | -1.349 (1.146) |
| Constant | 33.739 | 32.422 | 35.093 |
| Observations | 6,000 | 3,000 | 3,000 |
| R ² | 0.0001 | 0.002 | 0.0005 |

⇒ U.S. non-voters and Trump voters donate 5 to 6 p.p. more to fellow citizens, others give the same amount.

International climate negotiations

In international climate negotiations, would you prefer [U.S.] diplomats to defend [U.S.] interests or global justice?

The typical answer is to defend one's country's "interests, to the extent it respects global justice."

Only one eighth wants to defend one's country's "interests, even if it goes against global justice."

Group defended

The most defended group is one's fellow citizens.

40% are universalist, i.e. defend all humans or sentient beings.

Biggest issues

To what extent do you think the following issues are a problem? *5-Likert scale*
(Mean of answers recoded in [-2, +2])

| | United States | Europe | France | Germany | Spain | United Kingdom |
|--------------------------------|---------------|--------|--------|---------|-------|----------------|
| Income inequality in [Country] | 0.3 | 0.4 | 0.4 | 0.4 | 0.7 | 0.4 |
| Climate change | 0.5 | 0.8 | 0.8 | 0.7 | 0.8 | 0.7 |
| Global poverty | 0.3 | 0.5 | 0.5 | 0.6 | 0.9 | 0.4 |

People rank these the importance of these 3 issues as follows:

1. Climate change
2. Global poverty
3. Income inequality in their country

Conclusion

1. Across the world, people are ready for international solidarity

- ▶ Consensus on the allocation key of emissions permits: equal per capita
- ▶ Near consensus for a global tax on millionaires or a global financial register
- ▶ Majorities support to channel 30-50% of global tax revenues to low-income countries
- ▶ Majorities support global climate policies, including with transfers detrimental to their countries
- ▶ Majorities support increased foreign aid if it really helps the poorest

1. Across the world, people are ready for international solidarity
 - ▶ Consensus on the allocation key of emissions permits: equal per capita
 - ▶ Near consensus for a global tax on millionaires or a global financial register
 - ▶ Majorities support to channel 30-50% of global tax revenues to low-income countries
 - ▶ Majorities support global climate policies, including with transfers detrimental to their countries
 - ▶ Majorities support increased foreign aid if it really helps the poorest
2. The support for global redistributive policies is mostly sincere
 - ▶ Majorities are willing to sign a real-stake petition for the GCS
 - ▶ The global tax on millionaires is given high priority, the GCS average priority
 - ▶ Progressive candidates would not lose vote by endorsing the GCS

1. Across the world, people are ready for international solidarity
 - ▶ Consensus on the allocation key of emissions permits: equal per capita
 - ▶ Near consensus for a global tax on millionaires or a global financial register
 - ▶ Majorities support to channel 30-50% of global tax revenues to low-income countries
 - ▶ Majorities support global climate policies, including with transfers detrimental to their countries

3. The mismatch between support and absence of global policies in the public debate remains unexplained
 - ▶ Climate change and global poverty are seen as biggest issues than national inequality
 - ▶ Most people show some adherence to universalism
 - ▶ No evidence of pluralistic ignorance: most people correctly guess others' support for the GCS

Alternative explanations for the mismatch are needed

- ▶ National bias in power structures (elections, media) and mental structures (hymns, sport teams)?
- ▶ Pluralistic ignorance of the elites? ⇒ Ongoing survey on Members of the European Parliament
- ▶ Ideas whose time has come, and just lack some advocacy? ⇒ Stay tune for the petition!

Appendix

Eu questionnaire

Descriptive statistics

OECD

Do you agree or disagree with the following statement: “[country] should take measures to fight climate change.” [Go back](#)

At which level(s) do you think public policies to tackle climate change need to be put in place? (Multiple answers are possible) [▶ Go back](#)

How should [country] climate policies depend on what other countries do?

If other countries do less, [country] should do... [► Go back](#)

[Question non posée aux U.S., au Danemark et en France] All countries have signed the Paris agreement that aims to contain global warming “well below +2 °C”. To limit global warming to this level, there is a maximum amount of greenhouse gases we can emit globally, called the carbon budget. Each country could aim to emit less than a share of the carbon budget. To respect the global carbon budget, countries that emit more than their national share would pay a fee to countries that emit less than their share.

Do you support such a policy? [▶ Go back](#)

[*Question not asked in the U.S., Denmark and France, answers to a similar question are displayed]

Suppose the above policy is in place. How should the carbon budget be divided among countries?

The emission share of a country should be proportional to its population, so that each human has an equal right to emit.; The emission share of a country should be proportional to its current emissions, so that those who already emit more have more rights to emit.; Countries that have emitted more over the past decades (from 1990 onwards) should receive a lower emission share, because they have already used some of their fair share.; Countries that will be hurt more by climate change should receive a higher emission share, to compensate them for the damages.

Percentage of support (somewhat or strong) among: *Strongly oppose; Somewhat oppose; Neither support nor oppose; Somewhat support; Strongly support* [► Go back](#)

Do you support or oppose establishing a global democratic assembly whose role would be to draft international treaties against climate change? Each adult across the world would have one vote to elect members of the assembly. [▶ Go back](#)

Imagine the following policy: a global tax on greenhouse gas emissions funding a global basic income. Such a policy would progressively raise the price of fossil fuels (for example, the price of gasoline would increase by [40 cents per gallon] in the first years). Higher prices would encourage people and companies to use less fossil fuels, reducing greenhouse gas emissions. Revenues from the tax would be used to finance a basic income of [\$30] per month to each human adult, thereby lifting the 700 million people who earn less than \$2/day out of extreme poverty. The average British person would lose a bit from this policy as they would face [\$130] per month in price increases, which is higher than the [\$30] they would receive.

Do you support or oppose such a policy? [▶ Go back](#)

Do you support or oppose a tax on all millionaires around the world to finance low-income countries that comply with international standards regarding climate action? This would finance infrastructure and public services such as access to drinking water, healthcare, and education. [▶ Go back](#)
