

A Global Climate Plan

Adrien Fabre (CNRS, CIRED)

June 2023

Introduction

A global solution for a global problem

Climate change is a global problem.

A global solution for a global problem

Climate change is a global problem.

Lower-income countries lack resources to tackle it.

A global solution for a global problem

Climate change is a global problem.

Lower-income countries lack resources to tackle it.

Absent global coordination, countries lack incentives to decarbonize.

A global solution for a global problem

Climate change is a global problem.

Lower-income countries lack resources to tackle it.

Absent global coordination, countries lack incentives to decarbonize.

Many ponder over the current lack of fairness.

A global solution for a global problem

Climate change is a global problem.

Lower-income countries lack resources to tackle it.

Absent global coordination, countries lack incentives to decarbonize.

Many ponder over the current lack of fairness.

A fair [Global Climate Plan](#) can address these key issues.

A global solution for a global problem

Climate change is a global problem.

Lower-income countries lack resources to tackle it.

Absent global coordination, countries lack incentives to decarbonize.

Many ponder over the current lack of fairness.

A fair [Global Climate Plan](#) can address these key issues.

We test it among the population in 20 countries

A fair [Global Climate Plan](#) can address these key issues.

We test it among the population in 20 countries

A global solution for a global problem

Climate change is a global problem.

Lower-income countries lack resources to tackle it.

Absent global coordination, countries lack incentives to decarbonize.

Many ponder over the current lack of fairness.

A fair [Global Climate Plan](#) can address these key issues.

We test it among the population in 20 countries ⇒ it [is widely supported](#).

Meeting the 2°C target

How can we guarantee an emissions trajectory in line with the carbon budget?

Meeting the 2°C target

How can we guarantee an emissions trajectory in line with the carbon budget?

A yearly **cap on global emissions**

Meeting the 2°C target

How can we guarantee an emissions trajectory in line with the carbon budget?

A yearly **cap on global emissions**

Meeting the 2°C target

How can we guarantee an emissions trajectory in line with the carbon budget?

A yearly **cap on global emissions** (or a global carbon price).

Emissions permits should be tradable and auctioned to polluting firms upstream.

Meeting the 2°C target

How can we guarantee an emissions trajectory in line with the carbon budget?

A yearly **cap on global emissions** (or a global carbon price).

Emissions permits should be tradable and auctioned to polluting firms upstream.

How to allocate carbon pricing revenues?

Meeting the 2°C target

How can we guarantee an emissions trajectory in line with the carbon budget?

A yearly **cap on global emissions** (or a global carbon price).

Emissions permits should be tradable and auctioned to polluting firms upstream.

How to allocate carbon pricing revenues?

Simple focal point: an **equal cash transfer** for all human adults.

Meeting the 2°C target

How can we guarantee an emissions trajectory in line with the carbon budget?

A yearly **cap on global emissions** (or a global carbon price).

Emissions permits should be tradable and auctioned to polluting firms upstream.

How to allocate carbon pricing revenues?

Simple focal point: an **equal cash transfer** for all human adults.

This “global basic income” of \$30-50/month would alleviate extreme poverty.

Meeting the 2°C target

How can we guarantee an emissions trajectory in line with the carbon budget?

A yearly **cap on global emissions** (or a global carbon price).

Emissions permits should be tradable and auctioned to polluting firms upstream.

How to allocate carbon pricing revenues?

Simple focal point: an **equal cash transfer** for all human adults.

This “global basic income” of \$30-50/month would alleviate extreme poverty.

This Global Climate Scheme garners majority support in the 20 countries surveyed.

Support for the Global Climate Scheme

International surveys with a focus on the West

Global survey (02/2021–02/2022):

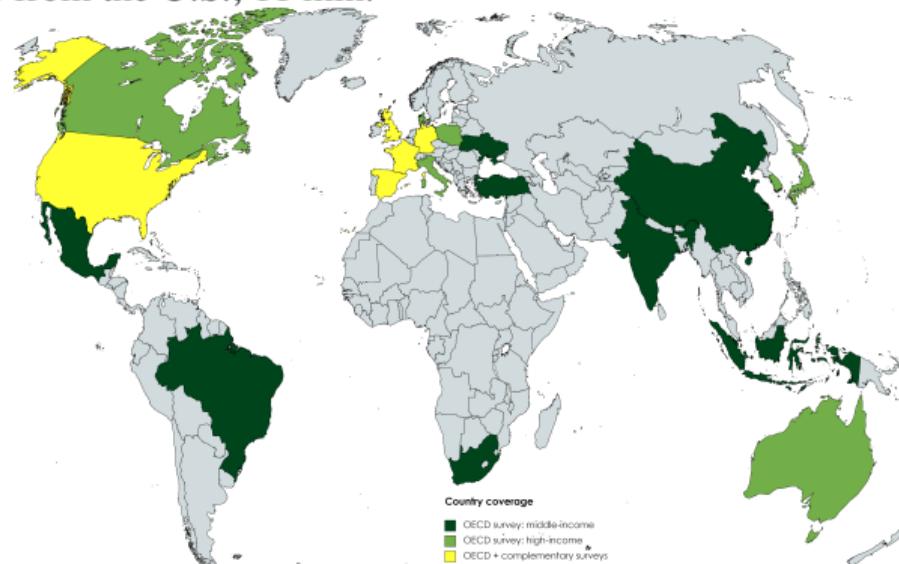

20 countries; 2,000 respondents per country; median duration: 28 min.

Complementary surveys (01–04/2023):

Eu: 3,000 respondents from France, Germany, Spain, UK; 20 min.

US1: 3,000 respondents from the U.S.; 14 min.

US2: 2,000 respondents from the U.S.; 11 min.

Stated support

Global survey: Global policies are strongly supported.

Share of support (somewhat or strongly) for the main global policies among non-indifferent.

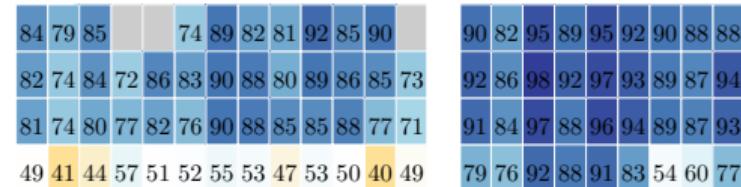

Level at which climate policies are needed (Multiple choice question)

Global

Global climate policies (5-Likert scale)

Global carbon budget (+2°C) divided in tradable country shares

Burden sharing preferences for the global carbon budget (5-Likert)

Emission share should be in proportion to population*

The Global Climate Scheme (GCS)

Our main policy of interest is the GCS, a **global emissions trading system funding a global basic income**:

At the Paris agreement in 2015, all countries have agreed to contain global warming “well below +2 °C”. To limit global warming to this level, **there is a maximum amount of greenhouse gases we can emit globally**.

To meet the climate target, a limited number of permits to emit greenhouse gases can be created globally. Polluting firms would be required to buy permits to cover their emissions. Such a policy would **make fossil fuel companies pay** for their emissions and progressively raise the price of fossil fuels. **Higher prices would encourage people and companies to use less fossil fuels, reducing greenhouse gas emissions.**

In accordance with the principle that each human has an equal right to pollute, the revenues generated by the sale of permits could finance a global basic income. **Each adult in the world would receive \$30/month**, thereby lifting out of extreme poverty the 700 million people who earn less than \$2/day.

The typical [American] would lose out financially [\$85] per month (as he or she would face [\$115] per month in price increases, which is higher than the \$30 they would receive).

The policy could be put in place as soon as countries totaling more than 60% of global emissions agree on it. Countries that would refuse to take part in the policy could face sanctions (like tariffs) from the rest of the World and would be excluded from the basic income.

Net gains from the Global Climate Scheme

Support for the Global Climate Scheme

To offset the losses of the median emitter, we design a **National Redistribution Scheme** (NR) funded by increased income taxes on the top 5% (US) / 1% (Eu).

Support for the Global Climate Scheme

To offset the losses of the median emitter, we design a **National Redistribution Scheme** (NR) funded by increased income taxes on the top 5% (US) / 1% (Eu).

We test understanding of the distributive effects of the GCS, NR, and both combined (and then give the expected answer) in an incentivized way after each policy description.

Support for the Global Climate Scheme

To offset the losses of the median emitter, we design a **National Redistribution Scheme** (NR) funded by increased income taxes on the top 5% (US) / 1% (Eu).

We test understanding of the distributive effects of the GCS, NR, and both combined (and then give the expected answer) in an incentivized way after each policy description.

We also describe a national climate policy. US: Coal exit / Eu: Insulation plan (mandatory, subsidised).

Support for the Global Climate Scheme

To offset the losses of the median emitter, we design a **National Redistribution Scheme** (NR) funded by increased income taxes on the top 5% (US) / 1% (Eu).

We test understanding of the distributive effects of the GCS, NR, and both combined (and then give the expected answer) in an incentivized way after each policy description.

We also describe a national climate policy. US: Coal exit / Eu: Insulation plan (mandatory, subsidised).

Do you support...? Yes/No (Percentage of Yes) ▶ Perceptions ▶ Complementary policies ▶ By vote

	United States	Europe	France	Germany	Spain	United Kingdom
Global climate scheme (GCS)	54	76	80	71	81	74
National redistribution scheme (NR)	56	73	77	66	79	75
National climate policy + GCS + NR	52	74	79	69	81	70

Stated support for other global redistribution policies

Support for other global policies

Do you support or oppose...? 5-Likert scale (Percentage of Support among non-Indifferent)

	United States	Europe	France	Germany	Spain	United Kingdom
Payments from high-income countries to compensate low-income countries for climate damages	55	71	72	70	79	70
High-income countries funding renewable energy in low-income countries	68	82	82	82	85	81
High-income countries contributing \$100 billion per year to help low-income countries adapt to climate change	60	76	77	79	79	71
Cancellation of low-income countries' public debt	46	53	53	43	62	61
Democratise international institutions (UN, IMF) by making a country's voting right proportional to its population	58	71	69	69	78	72
Removing tariffs on imports from low-income countries	62	73	58	73	80	83
A minimum wage in all countries at 50% of local median wage	63	80	80	78	81	83
Fight tax evasion by creating a global financial register to record ownership of all assets	62	87	90	86	91	87
A maximum wealth limit of \$10 billion (US) / €100 million (Eu) for each human	46	62	58	62	65	67
National tax on millionaires	73	85	81	87	89	88
Global tax on millionaires	69	84	84	84	87	83

Support for a global wealth tax

We describe a global tax on wealth in excess of \$/€/£ 5 million and either ask:

Support for a global wealth tax

We describe a global tax on wealth in excess of \$/€/£ 5 million and either ask:

Percent of wealth tax that should go to low-income countries (*mean*):

Support for a global wealth tax

We describe a global tax on wealth in excess of \$/€/£ 5 million and either ask:

Percent of wealth tax that should go to low-income countries (*mean*):

Whether half of the tax revenues should go to low-income countries (vs. none).

⇒ Median Eu preference is 30% of global wealth tax for low-income countries.

Sincerity of the support for the GCS

Petition

Would you be willing to sign a petition for the [GCS / NR]?

As soon as the survey is complete, we will send the results to the [head of state] (...) Yes/No

	United States	Europe	France	Germany	Spain	United Kingdom
Petition for the GCS	51	69	69	66	78	69
(Comparable) support for the GCS	53	76	81	74	81	74
Petition for NR	57	67	65	66	74	68
(Comparable) support for NR	58	72	76	65	78	75

Willingness to sign a real-stake petition is generally (1 to 7 p.p.) lower than stated support.

But this is not specific to GCS, and majorities are still willing to sign the petition.

List experiment

We ask *Among the policies below, how many do you support?*, randomly varying the list of policies.

The difference in mean number of supported policies for lists with and without the GCS should equal the support for GCS. If the tacit support is lower, it may indicate a social desirability bias.

List experiment

We ask *Among the policies below, how many do you support?*, randomly varying the list of policies.

The difference in mean number of supported policies for lists with and without the GCS should equal the support for GCS. If the tacit support is lower, it may indicate a social desirability bias.

R ²	0.089	0.065	0.125

Note:

*p<0.1; **p<0.05; ***p<0.01

⇒ No (significant) social desirability bias.

Conjoint analyses: influence on electoral prospects

Choice between a conservative platform and a progressive platform with/without the GCS.

Imagine if the two favorite candidates in your constituency in the next general election campaigned with the following policies in their party's platforms.

Which of these candidates would you vote for?

Candidate A	Candidate B
Windfall tax on oil companies	Cut the burden of tax on business
Ban the sale of new combustion-engine cars by 2030	£100 billion for infrastructures like road and rail
£150 billion to upgrade schools, hospitals, care homes and council houses	Tougher sentencing for the worst offenders and 10,000 more prison places
National redistribution scheme	Strict enforcement of immigration and border legislation
Global climate scheme	

Candidate A

Candidate B

None of them

Imagine if the two favorite candidates in your constituency in the next general election campaigned with the following policies in their party's platforms.

Which of these candidates would you vote for?

Candidate A	Candidate B
Windfall tax on oil companies	Cut the burden of tax on business
Ban the sale of new combustion-engine cars by 2030	£100 billion for infrastructures like road and rail
£150 billion to upgrade schools, hospitals, care homes and council houses	Tougher sentencing for the worst offenders and 10,000 more prison places
National redistribution scheme	Strict enforcement of immigration and border legislation

Candidate A

Candidate B

None of them

Conjoint analyses: influence on electoral prospects

Table 1: Imagine if the [Democratic and Republican presidential candidates in 2024] campaigned with the following policies in their platforms. [Credible Progressive and Conservative platforms]
Which of these candidates would you vote for? *A; B; None of them*
[FR: second round of presidential; DE, ES, UK: two favorite candidates in one's constituency]

	Prefers the Progressive platform					
	All	United States	France	Germany	UK	Spain
GCS in Progressive platform	0.028* (0.014)	0.029 (0.022)	0.112*** (0.041)	0.015 (0.033)	0.008 (0.040)	-0.015 (0.038)
Constant	0.623	0.604	0.55	0.7	0.551	0.775
Observations	5,202	2,619	605	813	661	504
R ²	0.001	0.001	0.013	0.0003	0.0001	0.0003

Note: The 14% of *None* answers have been excluded from the regression samples. GCS has no significant influence on them.

A progressive candidate would not lose votes by endorsing the GCS, and could even gain 11 p.p.*** in France.

Conjoint analyses: influence on preferred platform

We ask the preference between two progressive platforms, where each measure is taken at random. The GCS is included in one of the platforms.

Imagine that a [Left or Center-left coalition wins the next elections]. Here are two possible platforms on which [the coalition] may campaign (the policies in each platform are randomly drawn from a pool of credible [Left/Center-left] policies).

Even if you do not support the Left, which of these platforms do you prefer?

[FR: Left or center-left; DE: rot-rot-grüne; ES: PSOE; UK: Labour; US: Democratic primary (*not asked to Republican*)]

Random programs: A+GCS preferred to B

58 60 61 59 65 58

⇒ Majorities prefer platforms that include the GCS.

Conjoint analyses: influence on preferred platform (UK)

► EU ► FR ► U.S.

Imagine that the Labour wins the next elections. Here are two possible platforms on which it may campaign (the policies in each platform are randomly drawn from a pool of credible Labour policies).

(...) which of these platforms do you prefer?

Climate policy:

- Ban of most polluting vehicles in city centers (low-emission zones)
- Thermal insulation plan
- Ban the sale of new combustion-engine cars by 2030

Economic issues:

- £150 billion to upgrade schools, hospitals, care homes and council houses
- Real Living Wage of £11 per hour for all workers aged 16 and over
- Reduce the average full-time weekly working hours to 32
- Re-establish neighbourhood policing and recruit 2,000 more frontline officers

Foreign policy:

- Global climate scheme
- Global tax on millionaires
- Global democratic assembly on climate change
- Doubling foreign aid

Societal issues:

- Strict enforcement of immigration and border legislation
- Legalization of cannabis

Tax system:

- National redistribution scheme
- Wealth tax

Second-order beliefs

Belief about the support

Beliefs on the support for the GCS are relatively accurate:

no evidence of pluralistic ignorance in the U.S.

an underestimation by 15-20 p.p. in Eu.

According to you, what percentage of [Americans] answer *Yes* to the previous question?

The three people who are closest to the true value get [\$50]. *Mean answer*

	United States	Europe	France	Germany	Spain	United Kingdom
Belief about GCS	52	59	61	56	63	57
Support for the GCS	54	76	80	71	81	74
Belief about NR	55	58	60	53	62	59
Support for NR	56	73	77	66	79	75

Universalist values

Donation to Africans vs. fellow citizens

Respondents might win a \$/€/£ lottery prize, they have to decide which share to donate if they win.
Donation is to people in need, either in Africa or in their own country (random treatment).

Donation to Africans vs. fellow citizens

Respondents might win a \$/€/£ lottery prize, they have to decide which share to donate if they win.
Donation is to people in need, either in Africa or in their own country (random treatment).

Table 2: (...) In case you are winner of the lottery, what share of the [\$]100 would you donate to [African / [own country]] people living in poverty through GiveDirectly?

	Donation to poor people (in %)		
	All	US	Eu
Poor is in own country	0.590 (0.867)	2.509* (1.300)	-1.349 (1.146)
Constant	33.739	32.422	35.093
Observations	6,000	3,000	3,000
R ²	0.0001	0.002	0.0005

⇒ U.S. non-voters and Trump voters donate 5 to 6 p.p. more to fellow citizens, others give the same amount.
Other results on universalism: ▶ Prioritization ▶ Negotiations ▶ Group defended ▶ Global issues

Wrapping up

1. Across the world, people are ready for international solidarity

- ▶ Consensus on the allocation key of emissions permits: equal per capita
- ▶ Majorities support global climate policies, including with transfers detrimental to their countries

1. Across the world, people are ready for international solidarity

- ▶ Consensus on the allocation key of emissions permits: equal per capita
- ▶ Majorities support global climate policies, including with transfers detrimental to their countries

2. The support for global redistributive policies is mostly sincere

- ▶ Majorities are willing to sign a real-stake petition for the GCS
- ▶ Progressive candidates would not lose vote by endorsing the GCS
- ▶ People prefer platforms that include the GCS

1. Across the world, people are ready for international solidarity
 - ▶ Consensus on the allocation key of emissions permits: equal per capita
 - ▶ Majorities support global climate policies, including with transfers detrimental to their countries
2. The support for global redistributive policies is mostly sincere
 - ▶ Majorities are willing to sign a real-stake petition for the GCS
 - ▶ Progressive candidates would not lose vote by endorsing the GCS
 - ▶ People prefer platforms that include the GCS
3. The mismatch between support and absence of global policies in the public debate remains unexplained
 - ▶ Most people show some adherence to universalism
 - ▶ No evidence of pluralistic ignorance: most people correctly guess others' support for the GCS

1. Across the world, people are ready for international solidarity
 - ▶ Consensus on the allocation key of emissions permits: equal per capita
 - ▶ Majorities support global climate policies, including with transfers detrimental to their countries
2. The support for global redistributive policies is mostly sincere

Global Redistribution Advocates

The Global Climate Plan (GCP)

An old idea

Grubb (1990), Agarwal & Narain (1991) and Bertram (1992) were the first advocates of an equal right to emit for each human.

An old idea

Grubb (1990), Agarwal & Narain (1991) and Bertram (1992) were the first advocates of an equal right to emit for each human.

Grubb (1990): “*by far the best combination of long term effectiveness, feasibility, equity, and simplicity, is obtained from a system based upon tradable permits for carbon emission which are allocated on an adult per capita basis*”.

An old idea

Grubb (1990), Agarwal & Narain (1991) and Bertram (1992) were the first advocates of an equal right to emit for each human.

Grubb (1990): “*by far the best combination of long term effectiveness, feasibility, equity, and simplicity, is obtained from a system based upon tradable permits for carbon emission which are allocated on an adult per capita basis*”.

A support renewed ever since: Baer et al. (2000), Jamieson (2001), Rajan (2021).

An old idea

Grubb (1990), Agarwal & Narain (1991) and Bertram (1992) were the first advocates of an equal right to emit for each human.

Grubb (1990): “*by far the best combination of long term effectiveness, feasibility, equity, and simplicity, is obtained from a system based upon tradable permits for carbon emission which are allocated on an adult per capita basis*”.

A support renewed ever since: Baer et al. (2000), Jamieson (2001), Rajan (2021).

In Cramton et al. (2015), all agree for a climate club with international transfers.

An old idea

Grubb (1990), Agarwal & Narain (1991) and Bertram (1992) were the first advocates of an equal right to emit for each human.

Grubb (1990): “*by far the best combination of long term effectiveness, feasibility, equity, and simplicity, is obtained from a system based upon tradable permits for carbon emission which are allocated on an adult per capita basis*”.

A support renewed ever since: Baer et al. (2000), Jamieson (2001), Rajan (2021).

In Cramton et al. (2015), all agree for a climate club with international transfers.

Gollier & Tirole (2015) synthesize the distributional decision with a *generosity* parameter, from grandfathering to equal per capita.

An old idea

Grubb (1990), Agarwal & Narain (1991) and Bertram (1992) were the first advocates of an equal right to emit for each human.

Grubb (1990): “*by far the best combination of long term effectiveness, feasibility, equity, and simplicity, is obtained from a system based upon tradable permits for carbon emission which are allocated on an adult per capita basis*”.

van den Bergh et al. (2020) propose an expanding climate club and a reorientation of COP negotiations.

The IMF (2019) propose either differentiated prices among countries or international transfers.

Carattini et al. (2019) find support of $\approx 80\%$ in India and $\approx 50\%$ in the U.S., UK, Australia for a global tax and dividend.

The trajectories

Global trajectories estimated for the Global Climate Plan

The trajectories

Global trajectories estimated for the Global Climate Plan

The trajectories

Global trajectories estimated for the Global Climate Plan

The principles

- ① A cap on emissions to meet the 2°C target.

The principles

- ① A cap on emissions to meet the 2°C target.

⇒ Define a carbon budget and an emissions trajectory.

The principles

① A cap on emissions to meet the 2°C target.

⇒ Define a carbon budget and an emissions trajectory.

ETSs already cover 17% of global GHG emissions (EU, China, South Korea...), are considered in various countries (India, Brazil, Nigeria).

The principles

① A cap on emissions to meet the 2°C target.

⇒ Define a carbon budget and an emissions trajectory.

ETSs already cover 17% of global GHG emissions (EU, China, South Korea...), are considered in various countries (India, Brazil, Nigeria).

② A global basic income that eradicates extreme poverty.

The principles

① A cap on emissions to meet the 2°C target.

⇒ Define a carbon budget and an emissions trajectory.

ETSs already cover 17% of global GHG emissions (EU, China, South Korea...), are considered in various countries (India, Brazil, Nigeria).

② A global basic income that eradicates extreme poverty.

At their peak, GCP revenues at 5% of world GDP, with 1% of world GDP in international transfers.

The principles

① A cap on emissions to meet the 2°C target.

⇒ Define a carbon budget and an emissions trajectory.

ETSs already cover 17% of global GHG emissions (EU, China, South Korea...), are considered in various countries (India, Brazil, Nigeria).

② A global basic income that eradicates extreme poverty.

At their peak, GCP revenues at 5% of world GDP, with 1% of world GDP in international transfers.

The basic income of $\approx \$50$ per month (in nominal) for each human above 15 would lift out of extreme poverty the 700 million people with less than \$2.15 a day (in PPP).

The principles

① A cap on emissions to meet the 2°C target.

⇒ Define a carbon budget and an emissions trajectory.

ETSs already cover 17% of global GHG emissions (EU, China, South Korea...), are considered in various countries (India, Brazil, Nigeria).

② A global basic income that eradicates extreme poverty.

At their peak, GCP revenues at 5% of world GDP, with 1% of world GDP in international transfers.

The basic income of $\approx \$50$ per month (in nominal) for each human above 15 would lift out of extreme poverty the 700 million people with less than \$2.15 a day (in PPP).

③ A climate club to foster global cooperation.

Provisions to accommodate subnational entities into the club.

They can opt out from the carbon border adjustment.

They can use their revenues as they please.

⇒ The states of California, New York, Illinois, Massachusetts... could join.

A provision to avoid anti-redistributive effects.

Participation mechanisms

An *opt out* provision to account for the ability to pay.

Middle-income countries with higher-than-average carbon footprint can opt out from the mutualization of revenues.

Opting out countries retain the auction revenues they collect.

Full opt out authorized up to 1.5 times world average GDP p.c.

Opt out right is phased out between 1.5 and 2 times world average GDP p.c.

⇒ China, Iran, South Africa... would not lose from the Global Climate Plan.

Provisions to accommodate subnational entities into the club.

They can opt out from the carbon border adjustment.

They can use their revenues as they please.

⇒ The states of California, New York, Illinois, Massachusetts... could join.

A provision to avoid anti-redistributive effects.

High-income countries with a lower-than-average carbon footprint would not receive any revenues.

The distributive effects

Distributive effects of the Global Climate Plan in 2030.

The distributive effects

Distributive effects of the Global Climate Plan throughout the century.

Complementarity with others policies

The basic income increases the fiscal capacity of low-income countries, which can raise taxes to fund public services and infrastructures.

Complementarity with others policies

The basic income increases the fiscal capacity of low-income countries, which can raise taxes to fund public services and infrastructures.

Other sources of funding (e.g. a global corporate tax) should sustain the basic income in the long run.

Complementarity with others policies

The basic income increases the fiscal capacity of low-income countries, which can raise taxes to fund public services and infrastructures.

Other sources of funding (e.g. a global corporate tax) should sustain the basic income in the long run.

A global wealth tax financing (at least in part) low-income countries can address historical responsibilities.

Complementarity with others policies

The basic income increases the fiscal capacity of low-income countries, which can raise taxes to fund public services and infrastructures.

Other sources of funding (e.g. a global corporate tax) should sustain the basic income in the long run.

A global wealth tax financing (at least in part) low-income countries can address historical responsibilities.

In high-income countries, national redistribution can offset the negative incidence on median emitters.

Complementarity with others policies

Conditions for increased foreign aid ▶ Perceptions

[Info on actual amount]. Do you support [the U.S.] transferring more money to low-income countries?

■ No, should be reduced ■ No, should remain stable ■ Yes, but at some conditions ■ Yes, should be increased

Conditions for increased foreign aid ▶ Perceptions

[Info on actual amount]. Do you support [the U.S.] transferring more money to low-income countries?

[If *at some conditions*] What conditions should be required for [the U.S.] to increase its foreign aid?

Conditions for increased foreign aid ▶ Perceptions

[Info on actual amount]. Do you support [the U.S.] transferring more money to low-income countries?

[If *at some conditions*] What conditions should be required for [the U.S.] to increase its foreign aid?

People want to help people (not oligarchs) and to foster climate action and human rights.

National preference is the main reason behind not wanting increased foreign aid.

Preferences over public spending

► Perceptions

Your previous answer shows that you would like to increase [UK] foreign aid.

How would you like to finance such increase in foreign aid? (Multiple answers possible)

People want better public services and higher taxes on the wealthiest.

Your previous answer shows that you would like to reduce [UK] foreign aid.

How would you like to use the freed budget? (Multiple answers possible)

Support for increased foreign aid

[» Go back](#)

Actual, perceived and preferred amount of foreign aid, with random info (or not) on actual amount. (*Mean*)

	United States	Europe	France	Germany	Spain	United Kingdom

Actual foreign aid is overestimated.

Majorities support more foreign aid.

Perceptions of the Global Climate Scheme

[Go back](#)

When determining your support or opposition to the Global climate scheme, which points are important to you?

Conjoint analyses: interaction with other policies [» Go back](#)

National climate policy (C) is as supported as the GCS, but no substitute for it.

Support for the GCS does not increase when complemented by National Redistribution.

⇒ Confirms that the **monetary loss is not a primary concern** for one's attitude toward the GCS.

Among the two following bundles of policies, which one would you prefer?

	United States	Europe	France	Germany	Spain	United Kingdom
Global climate scheme (GCS)	54	76	80	71	81	74
NR+GCS preferred to NR	55	77	79	74	79	77
C+NR+GCS preferred to C+NR	55	74	79	71	78	68
NR+C preferred to NR	62	84	88	83	84	82
GCS+NR preferred to C+NR	47	52	53	53	49	52

Conjoint analyses: influence on preferred platform (Eu) [» Go back](#)

(...) Even if you do not support the Left, which of these platforms do you prefer?

Europeans prefer platforms that include the GCS and without the ban on thermal cars (a planned policy).

The effect of GCS is among the highest (wealth tax, better public services, higher minimum wage).

Conjoint analyses: influence on preferred platform (France) [▶ Go back](#)

France shows that there can be a **mismatch between preferred policies** (insulation plan, public services, global tax, GCS) **and enacted policies** (higher retirement age and ban on thermal cars: the least preferred).

Imaginez que la gauche ou le centre gauche gagne les prochaines élections en 2027. Voici deux programmes possibles sur lesquels elle pourrait faire campagne (...), lequel de ces programmes préférez-vous ?

Climat:

Interdiction des véhicules les plus polluants dans les centres-villes (ZFE)

Plan pour l'isolation thermique

Interdiction de la vente de voitures thermiques neuves d'ici 2030

Économie:

Versement du RSA aux 18-25 ans sans emploi

SMIC à 1600€ net par mois

Recul de l'âge légal de départ à la retraite à 65 ans

Hausse de 20% du financement de l'hôpital public et de l'Éducation nationale

Politique étrangère:

Plan mondial pour le climat

Taxe mondiale sur les millionnaires

Assemblée démocratique mondiale sur le changement climatique

Doubler l'aide au développement des pays à faibles revenus

Démocratie:

Élection des députés à la proportionnelle

Référendum d'Initiative Citoyenne (RIC)

Fiscalité:

Plan de redistribution nationale

Rétablissement de l'impôt sur la fortune (ISF)

Conjoint analyses: influence on preferred platform (US)

[Go back](#)

Endorsing the GCS is not determinant to gain the Democratic primary.

[Only on non-Republican] Imagine that at the 2024 Democratic party presidential primaries, the two main candidates campaign with the following key policies in their platforms.

Which of these candidates do you prefer?

Climate policy:

Ban the sale of new combustion-engine cars by 2030

Coal exit

Trillion dollar investment in clean transportation infrastructure and building insulation

Economic issues:

\$15 minimum wage

Funding affordable housing

Student loan forgiveness

Universal childcare/pre-K

Foreign policy:

Doubling foreign aid

Global climate scheme

Global democratic assembly on climate change

Global tax on millionaires

Societal issues:

Expanding the Supreme Court

Handgun ban

Making abortion a right at the federal level

Tax system:

Increase corporate income tax rate from 21% to 28%

National redistribution scheme

Wealth tax

“you have 100 points that you can allocate to different policies. The more you give points to a policy, the more you support it.

How do you allocate the points among the following policies?”
[6 policies taken at random]

GCS is as prioritized as the average policy, or even more in France and Germany.

It is more prioritized than some planned climate policies, like the ban on thermal cars.

The global tax on millionaires is among the most prioritized measures. It is prioritized as a national wealth tax, if not more.

Most prioritized are better public services and a higher minimum wage.

Prioritization

International climate negotiations

[» Go back](#)

In international climate negotiations, would you prefer [U.S.] diplomats to defend [U.S.] interests or global justice?

The typical answer is to defend one's country's "interests, to the extent it respects global justice."
Only one eighth wants to defend one's country's "interests, even if it goes against global justice."

Group defended

[» Go back](#)

What group do you defend when you vote?

The most defended group is one's fellow citizens.

40% are universalist, i.e. defend all humans or sentient beings.

Biggest issues

[Go back](#)

To what extent do you think the following issues are a problem? *5-Likert scale*
(Mean of answers recoded in [-2, +2])

People rank these the importance of these 3 issues as follows:

1. Climate change
2. Global poverty
3. Income inequality in their country

Do you agree or disagree with the following statement: “[country] should take measures to fight climate change.” [► Go back](#)

At which level(s) do you think public policies to tackle climate change need to be put in place? (Multiple answers are possible) [► Go back](#)

How should [country] climate policies depend on what other countries do?

If other countries do more, [country] should do... [▶ Go back](#)

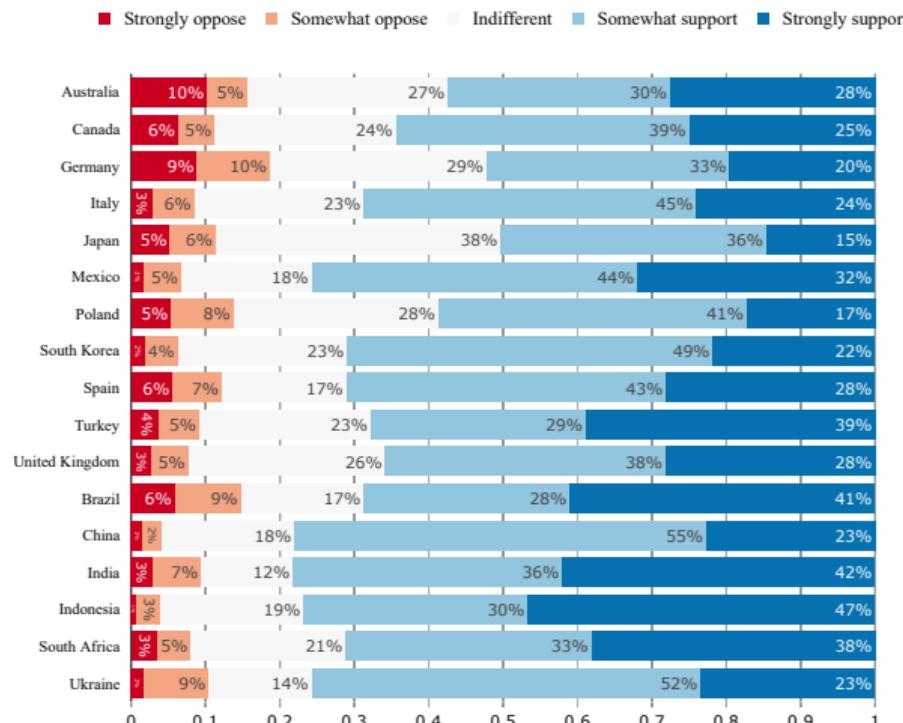

How should [country] climate policies depend on what other countries do?

If other countries do less, [country] should do... [▶ Go back](#)

[Question non posée aux U.S., au Danemark et en France] All countries have signed the Paris agreement that aims to contain global warming “well below +2 °C”. To limit global warming to this level, there is a maximum amount of greenhouse gases we can emit globally, called the carbon budget. Each country could aim to emit less than a share of the carbon budget. To respect the global carbon budget, countries that emit more than their national share would pay a fee to countries that emit less than their share.

Do you support such a policy? [► Go back](#)

[*Question not asked in the U.S., Denmark and France, answers to a similar question are displayed]

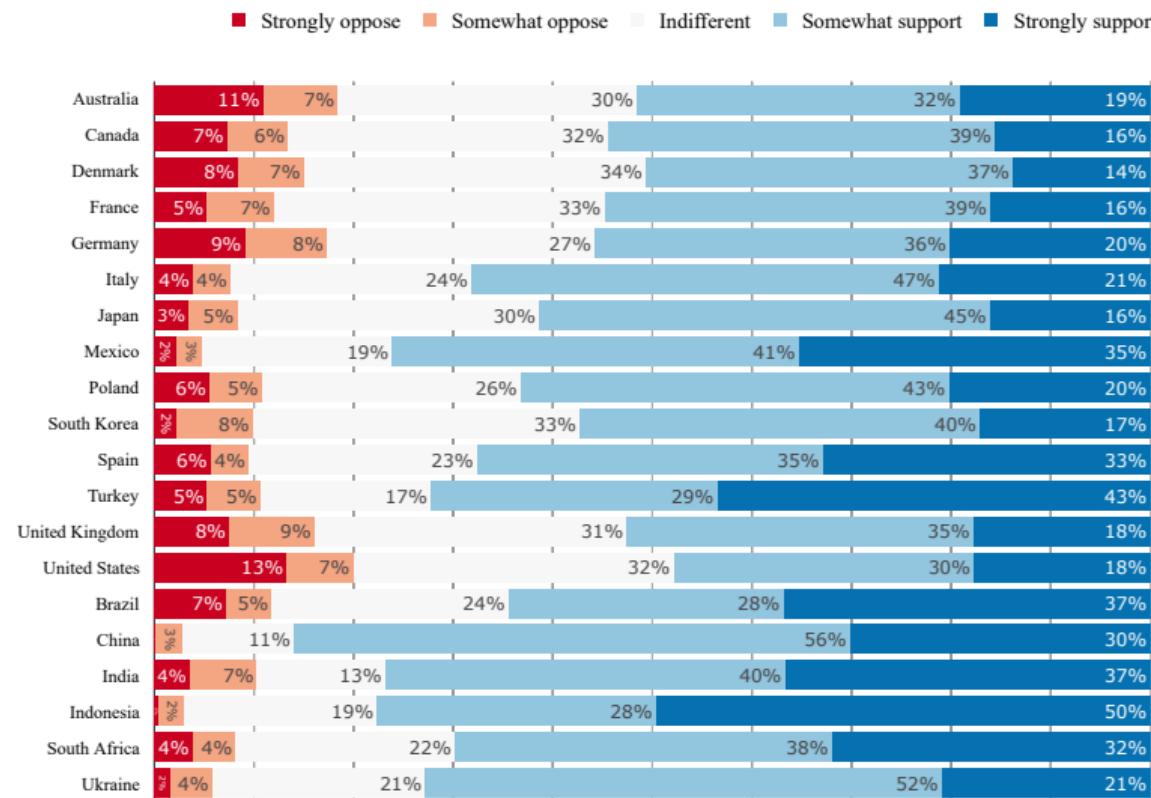

Suppose the above policy is in place. How should the carbon budget be divided among countries?

The emission share of a country should be proportional to its population, so that each human has an equal right to emit.; The emission share of a country should be proportional to its current emissions, so that those who already emit more have more rights to emit.; Countries that have emitted more over the past decades (from 1990 onwards) should receive a lower emission share, because they have already used some of their fair share.; Countries that will be hurt more by climate change should receive a higher emission share, to compensate them for the damages.

Percentage of support (somewhat or strong) among: *Strongly oppose; Somewhat oppose; Neither support nor oppose; Somewhat support; Strongly support* [► Go back](#)

Countries that have emitted more since 1990 should receive a lower share*	44	42	45	28	54	45	51	42	44	48	48	42	41	58	56	65	67	63	47	53	58	52
Countries that will be hurt more by CC should receive a higher share*	44	42	39	41	51	37	42	51	53	43	48	38	41	63	58	74	72	70	54	61	60	47

Do you support or oppose establishing a global democratic assembly whose role would be to draft international treaties against climate change? Each adult across the world would have one vote to elect members of the assembly. [► Go back](#)

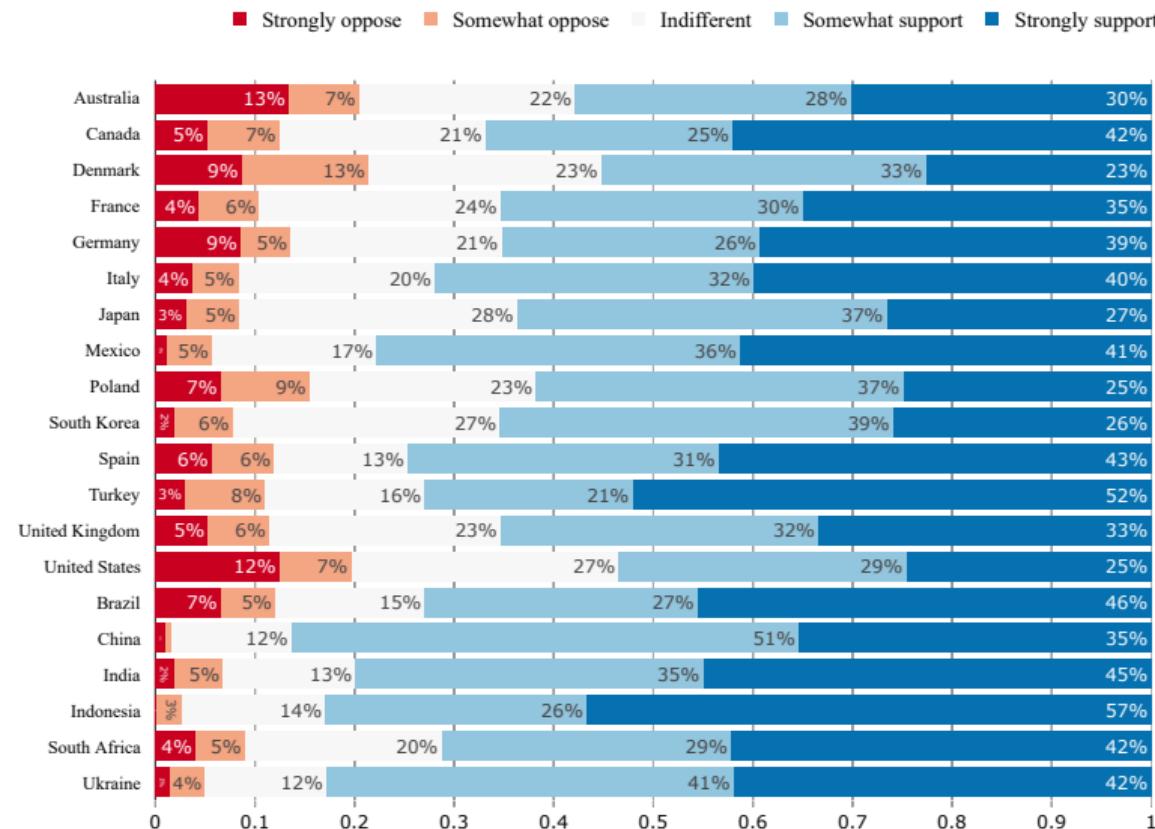

Imagine the following policy: a global tax on greenhouse gas emissions funding a global basic income. Such a policy would progressively raise the price of fossil fuels (for example, the price of gasoline would increase by [40 cents per gallon] in the first years). Higher prices would encourage people and companies to use less fossil fuels, reducing greenhouse gas emissions. Revenues from the tax would be used to finance a basic income of [\$30] per month to each human adult, thereby lifting the 700 million people who earn less than \$2/day out of extreme poverty. The average British person would lose a bit from this policy as they would face [\$130] per month in price increases, which is higher than the [\$30] they would receive.

Do you support or oppose such a policy? ▶ [Go back](#)

Do you support or oppose a tax on all millionaires around the world to finance low-income countries that comply with international standards regarding climate action? This would finance infrastructure and public services such as access to drinking water, healthcare, and education. ▶ Go back

Synthèse : Pourcentage de réponses positive (e.g. Plutôt/Très favorable). ▶ Go back
